

SOFTWARE ENGINEER

The mission of this awesome tribe at MEDIAGENIX is to enable renowned public and commercial radio and TV stations, on-demand platforms, OTT streamers and telcos to bring content to the viewer with our broadcast management system called WHATS'ON.

Help us develop innovative software solutions for the fast-paced media world. Share our professional pride: the pride you feel when you see that the BBC's, MTV's, and Disney's of this world use the solution you work on; the pride in the craftsmanship you can keep perfecting. Because very knowledgeable colleagues support you and share their knowledge as they also share that unquenchable thirst for continuous improvement.

These are exciting times, as we are adapting and moving our amazingly extensive and sophisticated software suite to a web- & cloud-based environment. You will be joining us in our continuing search for new, inspired software solutions that meet new needs of the fast-paced media world and help our customers with their digital transformation.

Your challenge

- You will develop for projects geared at the needs of the customer and/or the requirements of the web- & cloud-based environment.
- You will work with analysts to translate customer needs into a creative software solution.
- You will write clean code, using state-of-the-art development stacks.
- You are responsible for automating development tasks.

Our wishlist

- You have a degree in Information Science or Engineering (and have proven experience with OO-design and development).
- You are an enthusiastic software engineer, open to new technologies and eager to learn.
- You have a passion for code, a drive for design and development responsibilities.
- You have a natural talent for teamwork with fellow software engineers, but also with our analysts, customer support professionals, project managers and business consultants.
- You communicate fluently in English.

Our offer

- We offer a competitive salary, including many benefits.
- MEDIAGENIX cares for its employees and therefore offers a healthy work/life balance.
- You grow = We grow! We assure the development of your talents and continuous coaching and support.

We are a human-centered employer, we speak up, dare, share and keep promises made. Interested in joining the tribe?

When you are enjoying content on TV, radio, smartphone, tablet or PC, you are also watching the works of the team that helps put that content right there. The mission of this awesome tribe is to enable renowned media companies worldwide to bring content to the viewer in the most efficient and future-proof way.

Our customers include public and commercial radio and TV stations, on-demand platforms, OTT streamers, telcos and their service providers. BBC, Discovery, Disney, Viacom, ... they all go for growth in this excitingly fast-paced media world.

To help them grow, we deliver innovative software solutions—on premise or web-based in the cloud—that optimise the life cycle of their content across channels and services. These modular solutions constitute the most advanced and efficient backbone for media operations, streamlining the content supply chain from acquisition over planning, scheduling and rights management to publication and beyond.

The state-of-the-art technologies we use, our agile development methodologies, the transparent way in which we collaborate as a team, and the inspiring co-creation with our customers have taken us to the top of tech vendors in the international media world. Join us on this magnificent journey.
