

# TECHNOLOGY - Starting in September 2020 or January 2021 (190000PM)

## Your Role

You're curious and you love to do new things. If someone handed you the latest innovation, you'd want to know what it could do, the benefits it could bring, and how it could be transformed into business opportunities.

You love to connect technology with business reality.

The Technology Fast 50, run by Deloitte each year, ranks Belgium's fastest growing technology companies. More importantly, it highlights the commitment to innovation that makes the firm itself such an inspiring place to launch your technology career.

Besides underpinning every part of our business, information technology is a hugely important part of it in its own right. More and more of our work involves technology, and our future is increasingly digital.

For someone like you, who is interested in information technology and everything it could do, you're delivering innovation into the business of our clients. By doing this, you'll have an endless string of the newest, freshest challenges to spark your interest.

You don't have to be a technology graduate as long as you're analytical and want to become expert at the technologies we use in our work. Depending on your own plans and ambitions, you could study for professional IT qualifications, or take specialist finance training. Throughout, you'll build a network of your own and work with the latest tech.
